Subject: Fw: Passaic GIS data requesting

Hi Rob,

During the phone calls we had to discuss the SSP2 locations, the CPG showed us GIS files with several layers and other information created to help the review process.

In order to prevent duplication of effort on our part, could you please share these files with us files, including any shapefiles, layers, geodatabases, tables, MXDs and related files that have been created or downloaded for the project? They may be burned to a DVD or we can provide an external drive to facilitate the transfer.

Please let me know if you have any questions.

Thanks,
Stephanie
